

Implementation Proposal Index: Digital Health Business Analysis

Ambulance handover process redesign and benefits realisation pack

Consulting company: CR Allied Services Limited | Client setting: Ambrose Alli University Health Center | Lead consultant: Edward Osikem Okhumaile

Implementation proposal version - July 2026

Evidence integrity note: This pack is written as a professional implementation proposal. KPI figures, stakeholder records, and feedback summaries should be validated with hospital data-owner approval before external circulation or executive sign-off.

1. Purpose

This evidence pack presents a structured business analysis engagement delivered by CR Allied Services Limited for Ambrose Alli University Health Center. It demonstrates problem discovery, stakeholder analysis, process redesign, requirements definition, implementation governance, SOP development, benefits measurement, and executive communication.

The pack is designed to support implementation planning, stakeholder alignment, healthcare operations improvement, product/process leadership, and business analysis impact reporting.

2. Evidence Pack Contents

Table 1. Deliverables included in the pack.

File	Delivery role	How it supports the implementation proposal
01 Business Analysis Case Study	End-to-end narrative of the problem, analysis, solution, and impact	Shows leadership, structured thinking, stakeholder influence, and measurable outcomes
02 Business Requirements Document	Scope, stakeholder needs, requirements, acceptance criteria, risks, and traceability	Shows professional BA delivery and product/process governance
03 SOP and Handover Toolkit	Operational procedure, handover checklist, RACI, escalation, training, and audit forms	Shows implementation readiness and adoption enablement
04 Implementation Impact and Feedback Report	Post-implementation KPI movement and feedback themes for validation	Shows benefits realisation and executive reporting
Impact Dashboard Workbook	Formula-driven Excel dashboard with charts and validation-ready feedback data	Shows analytical communication, KPI design, and data storytelling

3. Implementation Evidence Positioning

Table 2. Evidence positioning map.

Implementation theme	Evidence in this pack	Recommended validation proof to attach
Digital transformation	Digitised ambulance-to-clinical handover workflow, standardised SBAR capture, KPI dashboard	Screenshots, implementation sign-off, system workflow diagrams
Impact	Measured reductions in handover delay, incomplete documentation, duplicate triage, and staff dissatisfaction	Pre/post data extract, signed hospital letter, audit report
Leadership / influence	Stakeholder map, RACI, governance plan, change plan, training pack	Letters from clinical leads and project sponsor
Sustainability / contribution	Reusable toolkit for emergency care handover improvement	Governance review, SOP approval, lessons learned summary, repository link

4. Suggested Validation Bundle

- Signed client letter confirming role, dates, scope, and measurable contribution.
- Before-and-after KPI extract with data owner sign-off.
- Screenshots or redacted examples of the implemented handover form, dashboard, or workflow.
- Training attendance records, SOP approval page, and governance meeting minutes.
- A concise implementation summary explaining decision points, benefits, and lessons learned.

5. Governance Guidance Checked

This pack should be reviewed against local clinical governance, information governance, patient-safety, and operational reporting requirements before implementation approval.
